

MAF-US Fact Sheet

The map shows the country locations (excluding two restricted access countries) where Mission Aviation Fellowship (MAF) serves. It also shows the locations of MAF affiliates that receive technical support from MAF, as well as two countries that are jointly operated with Mission Aviation Fellowship International (MAFI), which is based in the United Kingdom. MAF partners with churches, relief organizations, missionaries, medical teams, and development agencies to bring help, hope, and healing to those who live in the most isolated parts of the world.

The MAF-US fleet flies over a million miles each year
and saves our passengers valuable travel time, which can be used for productive ministry work.
